THE POWER OF ITALIAN SIMPLICITY

Multifunctional sprayers  
for professionals, advanced hobbyists  
and dynamic farms

MOUNTED SPRAYERS

TRAILED SPRAYERS

The DELTA FORCE line was born from a clear idea: to offer a range of professional sprayers at the right price, without compromising on quality, reliability, and service.

Designed, built, and assembled in Italy, all DELTA FORCE sprayers are designed to adapt to different crops, environments, and surfaces: vegetable gardens, vineyards, orchards, open fields, greenhouses, and olive groves.

Easy to use, robust, versatile, and delivered directly from the factory to the customer, without intermediaries: this is our commitment to providing access to more efficient, practical, and sustainable agriculture.

## DELTA FORCE LINE

# Common strengths

- ✓ **MADE IN ITALY**  
Selected components, in-house design, and guaranteed quality control
- ✓ **FACTORY-DIRECT PRICES**  
Maximum transparency and value for money
- ✓ **VERSATILITY OF USE**  
A range designed for different crops and agricultural contexts
- ✓ **RAPID ASSISTANCE AND SPARE PARTS**  
Direct technical support, including after-sales

# COMPACT AIR GA GAV

MOUNTED SPRAYERS FOR SMALL 18HP TRACTORS

## Lightweight and compact mounted sprayers

The Compact Air line is designed for small vineyards, orchards, vegetable gardens, gardens, nurseries, and crops in confined spaces. Ideal for hobbyists and farmers seeking a simple, reliable, and easy-to-use solution. Compact design, excellent maneuverability, and Made in Italy quality.

### Characteristics

- ✓ Fan: Ø 500 mm
- ✓ Compact: ~80 cm wide

### Strengths

- ✓ Compact design: perfect for small tractors and limited spaces
- ✓ Multifunctional: suitable for various types of crops and treatments
- ✓ Unbeatable price, with quality guaranteed by the Italian manufacturer
- ✓ Easy to use: intuitive controls, ready to use

# TURBO AIR ATV

TRAILED SPRAYERS WITH LARGER AXIAL FAN

## Robust and versatile

Designed for those who need greater autonomy and a wide range of work, the Turbo Air is a robust and reliable machine. Ideal for vegetable gardens, orchards, or medium-sized vineyards. Easy to tow, it offers high performance even with lightweight tractors.

## Characteristics

- ✓ High precision distribution
- ✓ Excellent maneuverability
- ✓ Robust yet lightweight

## Strengths

- ✓ Powered impeller for a wide operating radius. Ideal for orchards.
- ✓ Dual-jet radial distribution system: even coverage.
- ✓ Components entirely made in Italy: robust and reliable.
- ✓ Aggressive price: top-of-the-line product within everyone's reach.

TURBO AIR  
ATV  
300-400 L

# MAXI JET ATP-EX

## PROFESSIONAL TRAILED SPRAYER

### Robust and versatile loaders for general use

It's the ideal solution for those seeking a good compromise between compact size and operational capacity. Multifunctional, it's suitable for a variety of agricultural uses: vineyards, orchards, and olive groves. Simple, durable, and affordable.

### Characteristics

- ✓ Axial fan Ø700-800mm
- ✓ Powerful and uniform coverage even in dense crops
- ✓ Robust structure, suitable for intensive treatments

### Strengths

- ✓ Excellent balance between compactness and power
- ✓ Designed for general, even non-specialist, use
- ✓ Selected Italian components
- ✓ Very advantageous quality/price ratio

MAXI JET  
ATP-EX  
600-800-1000-1500 L

# FRONT CLEAN JET ATI-EX

## PROFESSIONAL TRAILED SPRAYER

### Robust and versatile flow rates with front suction

It's the ideal solution for those seeking a good compromise between compact size and operational capacity. Multipurpose, suitable for multiple agricultural uses: vineyards, orchards, and olive groves. Simple, durable, and affordable.

### Characteristics

- ✓ Front suction removes leaves, dust, and sediment from the ground.
- ✓ Powerful and uniform coverage even in dense crops.
- ✓ Robust structure, suitable for intensive treatments.

### Strengths

- ✓ Cleaner treatment that doesn't stain the fruit
- ✓ Lower risk of downy mildew
- ✓ Excellent balance between compactness and power
- ✓ Designed for general, even non-specialist, use
- ✓ Selected Italian components
- ✓ Very advantageous quality/price ratio

FRONT CLEAN JET  
ATI-EX  
600-700-800 L

# TWIN FLOW ATD-EX

## TRAILED SPRAYER

### Double fan, uniform coverage

The Twin Flow series is designed to provide more even spray distribution, thanks to the double counter-rotating reverse-action fan with front-facing suction. It works perfectly with the same amount of air from both sides for even distribution. The reverse-action principle prevents the suction of debris, leaves, and dust from the ground, which can cause botrytis.

### Characteristics

- ✓ Counter-rotating fans - ATD, ATD2, ATD3 versions
- ✓ High and medium pressure volumetric pump
- ✓ Ideal for flat or slightly sloping terrain

### Strengths

- ✓ Balanced and uniform coverage
- ✓ Ideal for fast and precise treatments
- ✓ Proven and reliable Italian technology
- ✓ Cost optimization with direct sales

TWIN FLOW  
ATD-EX  
600-800-1000 L

# WINE PRO APL-G

## MOUNTED SPRAYERS WITH AXIAL CONVEYOR

### Precision in rows, power in treatment

Designed for pergola vineyards and container orchards. It ensures uniform coverage and targeted treatments even in dense canopies.

### Characteristics

- ✓ Compact and easy to maneuver between rows
- ✓ Reduces waste and passages
- ✓ Ideal for lightweight tractors in tight spaces

### Strengths

- ✓ Suitable for targeted and localized treatments
- ✓ Robust and reliable construction
- ✓ Easy to transport and handle, even in tight spaces
- ✓ Made in Italy with attention to detail

# COMPACT GC-S

## MOUNTED SPRAYER

### The multipurpose scope for everyday farming

The Compact line is designed for the everyday user looking for a simple, effective, and hassle-free machine. Ideal for weed control and localized treatments with a hand sprayer; small plots of land, both on flatland and hillsides.

### Characteristics

- ✓ 3-point hitch for first-class tractor
- ✓ Ideal for weed control and extensive treatments
- ✓ Compatible with customizable booms and controls

### Strengths

- ✓ Simple, ready-to-use machine
- ✓ Suitable for those seeking practicality and functionality
- ✓ Low operating costs, minimal maintenance
- ✓ Available in multiple capacities to suit every need

COMPACT GC-S  
200-300 L

COMPACT GC-S  
400-500-600-800-1000 L

# OLIVIA APTL

## CANNON-MOUNTED SPRAYER

### For tall olive groves and greenhouse treatments

Adjustable cannon with single or double suction turbine (400 or 450 mm), for tractors from 25 HP and up, with adjustable vertical nozzles for tall trees, suitable for treating plants and open fields. Anti-clogging system for intensive treatments, tested on Mediterranean crops.

### Characteristics

- ✓ Adjustable cannon, diameter 450 mm
- ✓ Anti-drip nozzles and ducted fan
- ✓ Suitable for tractors from 25 HP and up

### Strengths

- ✓ Adjustable vertical jet for tall trees
- ✓ Special anti-clogging configuration for intensive treatments
- ✓ Designed for Mediterranean crops: field-tested

OLIVIA FLEXI  
APTL-F  
300-400-500-600 L

OLIVIA CROP  
APTL-S  
300-400-500-600 L

# TURBO JET NTF

## TRAILED SPRAYERS WITH LARGER AXIAL FAN

### Trailed sprayer for awning vineyards

Designed for those who need reliability and power, the trailed model is the ideal machine for treatments in orchards, vegetable gardens, and farms. Thanks to its long battery life, you can work without interruptions, while its high performance ensures consistently excellent results. Perfect for covering large areas quickly and efficiently, it's the perfect ally for those with large plots of land to manage.

### Characteristics

- ✓ Fan-shaped diffuser for uniform lateral coverage
- ✓ Ideal for canopy vines and tall crops
- ✓ Robust and high-capacity

### Strengths

- ✓ Powered impeller for a wide operating radius.
- ✓ Dual-jet radial distribution system: uniform coverage
- ✓ Aggressive price: top-of-the-line, affordable for everyone

TURBO JET  
NTF  
600-800-1000 L

# ECO JET APLV

## SPRAYERS MOUNTED WITH ANTI-DRIFT TURRET

### Compact precision for modern viticulture

Reliable, innovative, and compact, ECOJET with its anti-drift turret offers precise and uniform treatments in vineyards, reducing drift and ensuring efficiency and sustainability. Reliable, innovative, designed for those seeking effective treatments with maximum control.

### Characteristics

- ✓ Fan diameter 600–800 mm
- ✓ Air flow up to 42,000 m<sup>3</sup>/h
- ✓ Compact width less than 1 m

### Strengths

- ✓ Anti-drift turret: reduces dispersion, greater precision
- ✓ Air-assisted spray: uniform coverage even in dense rows
- ✓ Compact and robust structure, resistant materials
- ✓ Designed for modern and sustainable viticulture

ECOJET  
APLV  
300-400-500-600 L

# FIELD PRO GC-BD

## MOUNTED SPRAYER

### Maximum compatibility

The solution for growing farmers looking for a solid, professional yet affordable sprayer. Greater capacity, a durable structure, and compatibility with a variety of crops. Versatile for vegetables, open fields, greenhouses, and fertilizing gardens and golf courses. Remove fruit, vines, and field plants.

### Characteristics

- ✓ Large tanks
- ✓ Stable chassis for use on various terrains
- ✓ Towed by a medium-sized tractor

### Strengths

- ✓ 400 to 1000-liter tanks for longer working times
- ✓ Robust and stable, even on uneven terrain
- ✓ Versatile for various types of terrain
- ✓ Safe investment with home warranty

FIELD PRO  
GC-BD  
400-600-800-1000 L

# FIELD HYDRO GC-BDI

MOUNTED SPRAYER – 6-10 METERS HYDRAULIC BOOM

## More breadth, more efficiency

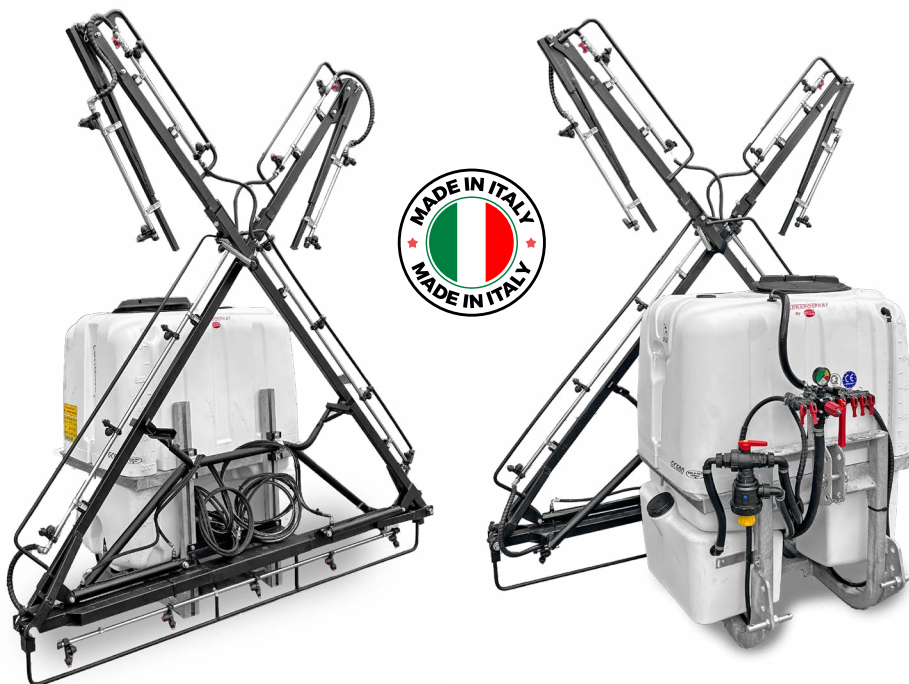

Designed for farms seeking wider coverage without sacrificing stability and ease of use. The 6- to 10-meter hydraulic boom allows for quick and precise treatments, even on large plots. Ideal for those looking to take crop protection to the next level.

## Characteristics

- ✓ 6, 8, and 10 m extendable hydraulic boom
- ✓ 600, 800, and 1000 m high-capacity tanks
- ✓ Reinforced frame for stability on any terrain
- ✓ Compatible with medium-powered tractors

## Strengths

- ✓ Wider coverage, shorter working time thanks to hydraulic opening
- ✓ Robust even with the boom fully open
- ✓ Versatile for open fields, vegetable greenhouses, and arable crops
